Prosecuting Maritime Piracy Mar 14 2021 This book addresses maritime piracy by focusing on the unique and fascinating issues arising in the course of domestic piracy prosecutions, from the pursuit and apprehension of pirates to their trial and imprisonment. It examines novel matters not addressed in other published works, such as the challenges in preserving and presenting evidence in piracy trials, the rights of pirate defendants, and contending with alleged pirates who are juveniles. A more thorough

understanding of modern piracy trials and the precedent they have established is critical to scholars, practitioners, and the broader community interested in counter-piracy efforts, as these prosecutions are likely to be the primary judicial mechanism to contend with pirate activity going forward.

Spatial Data Mining Apr 26 2022 · This book is an updated version of a well-received book previously published in Chinese by Science Press of China (the first edition in 2006 and the second

in 2013). It offers a systematic and practical overview of spatial data mining, which combines computer science and geo-spatial information science, allowing each field to profit from the knowledge and techniques of the other. To address the spatiotemporal specialties of spatial data, the authors introduce the key concepts and algorithms of the data field, cloud model, mining view, and Deren Li methods. The data field method captures the interactions between spatial objects by diffusing the data contribution from a universe of samples to a universe of population, thereby bridging the gap between the data model and the recognition model. The cloud model is a qualitative method that utilizes quantitative numerical characters to bridge the gap between pure data and linguistic concepts. The mining view method discriminates the different requirements by using scale, hierarchy, and granularity in order to uncover the anisotropy of spatial data mining. The Deren Li method performs data preprocessing to prepare

it for further knowledge discovery by selecting a weight for iteration in order to clean the observed spatial data as much as possible. In addition to the essential algorithms and techniques, the book provides application examples of spatial data mining in geographic information science and remote sensing. The practical projects include spatiotemporal video data mining for protecting public security, serial image mining on nighttime lights for assessing the severity of the Syrian Crisis, and the applications in the government project 'the Belt and Road Initiatives'.

Routledge Handbook of Media Law Jul 30 2022 Featuring specially commissioned chapters from experts in the field of media and communications law, this book provides an authoritative survey of media law from a comparative perspective. The handbook does not simply offer a synopsis of the state of affairs in media law jurisprudence, rather it provides a better understanding of the forces that generate

media rules, norms, and standards against the background of major transformations in the way information is mediated as a result of democratization, economic development, cultural change, globalization and technological innovation. The book addresses a range of issues including: Media Law and Evolving Concepts of Democracy Network neutrality and traffic management Public Service Broadcasting in Europe Interception of Communication and Surveillance in Russia State secrets, leaks and the media A variety of rule-making institutions are considered, including administrative, and judicial entities within and outside government, but also entities such as associations and corporations that generate binding rules. The book assesses the emerging role of supranational economic and political groupings as well as non-Western models, such as China and India, where cultural attitudes toward media freedoms are often very different. Monroe E. Price is Director of the Center for Global

Communication Studies at the Annenberg School for the University of Pennsylvania and Joseph and Sadie Danciger Professor of Law and Director of the Howard M. Squadron Program in Law, Media and Society at the Cardozo School of Law. Stefaan Verhulst is Chief of Research at the Markle Foundation. Previously he was the co-founder and co-director, with Professor Monroe Price, of the Programme in Comparative Media Law and Policy (PCMLP) at Oxford University, as well as senior research fellow at the Centre for Socio Legal Studies. Libby Morgan is the Associate Director of the Center for Global Communication Studies at the Annenberg School for the University of Pennsylvania.

Human Geopolitics Feb 22 2022 Human geopolitics, the competition for population rather than territory, is an essential but weakly understood dimension of world politics today. Such competition has preceded violent conflict throughout history, but has been muted since the Treaties of Westphalia laid the territorial

foundations of the modern international system in the mid-seventeenth century. Today, however, human geopolitics is being resurrected in unanticipated ways, as governments are enabled and encouraged to engage their emigrant diasporas. How and why is this happening? Until now these questions have been difficult to answer. The majority of research attention has focused on questions of immigration policy in a handful of wealthy migrant destination countries, largely ignoring the emigration policies that preoccupy the worlds many migrant origin states. This book addresses that research imbalance, by focusing on the overlooked sending side of migration policy. Drawing on data covering all UN members across the post-WWII period, and fieldwork with high-level policy makers across 60 states and a dozen international organisations, the book charts the re-emergence of human geopolitics through the global spread of diaspora institutions government ministries and offices dedicated to

emigrants and their descendants. It calls for the development of stronger guiding principles and evaluation frameworks to govern these new state-diaspora relations in an era of unprecedented global interdependence. Signals and Images Jun 16 2021 Signals and Images: Advances and Results in Speech, Estimation, Compression, Recognition, Filtering, and Processing cohesively combines contributions from field experts to deliver a comprehensive account of the latest developments in signal processing. These experts detail the results of their research related to audio and speech enhancement, acoustic image estimation, video compression, biometric recognition, hyperspectral image analysis, tensor decomposition with applications in communications, adaptive sparse-interpolated filtering, signal processing for power line communications, bio-inspired signal processing, seismic data processing, arithmetic transforms for spectrum computation, particle filtering in

cooperative networks, three-dimensional television, and more. This book not only shows how signal processing theory is applied in current and emerging technologies, but also demonstrates how to tackle key problems such as how to enhance speech in the time domain, improve audio quality, and meet the desired electrical consumption target for controlling carbon emissions. *Signals and Images: Advances and Results in Speech, Estimation, Compression, Recognition, Filtering, and Processing* serves as a guide to the next generation of signal processing solutions for speech and video coding, hearing aid devices, big data processing, smartphones, smart digital communications, acoustic sensors, and beyond.

IPv6 Deployment and Management Oct 21 2021
With the announcement in 2011 that the current Internet Protocol (IP), IPv4, has nearly run out, interest in IPv6 -- the latest IP version -- has grown substantially. This book describes IPv6 technology and its repercussions on

organizations, including strategies and techniques for assessing the impact of deploying IPv6 on a network, discovering current IP assets, assessing network readiness, creating a plan to deploy IPv6 while retaining IPv4 connectivity, and for managing a dual protocol IPv4-IPv6 network. It is a must read for IP network engineers, managers, and those who work in IT.

International Migration and Development in

South Asia May 16 2021
In migration studies, the nexus between migration and development in the global South has been meticulously debated. However, a unanimous resolution to this debate has not been found, due to the ever-changing nature of international migration. This book advances knowledge on the global debate on the migration-development relationship by documenting experiences in a number of countries in South Asia. Drawing on the experiences of global South Asians, this volume documents the impact of migration on the social, economic, and political fields in the broader

context of development. It also presents a regional experience by looking into the migration-development nexus in the context of South Asia, and analyses the role South Asian migrants and diaspora communities play in the South Asian society. Contributions from a variety of disciplinary backgrounds, including sociology, anthropology, political science, international relations and economics, document the development implications of South Asian migration. Broad in scope in terms of contents, timeline of migration, and geographical coverage, the book presents empirically-based case studies involving India, Bangladesh, Sri Lanka, Pakistan, and Nepal and their emigrants living and working in different parts of the world. Going beyond reporting the impacts of migration on economic development by highlighting the implications of 'social development' on society, this book provides a fascinating contribution to the fields of Asian Development, Migration Studies and South

Asian Studies.

Access to Justice in Arbitration Jul 06 2020
Access to Justice in Arbitration Concept, Context and Practice Edited by Leonardo V P de Oliveira & Sara Hourani The exponential growth of arbitration beyond commercial and investment matters, reaching disputes that have traditionally been decided by courts - such as labour and employment, sports, and competition disputes, and those involving human rights violations - raises questions about the impact of this expansion on access to justice. This collection of essays by arbitral practitioners, academics, and arbitral institution officials presents, for the first time, an in-depth analysis of the role access to justice plays in arbitration. Overall, the book assesses how access to justice can be guaranteed in arbitration and, in particular, shows how access to justice works in various types of arbitration. The book and its contributions will be of immeasurable value in determining the practical application of such

concerns as the following: when issues of access to justice can be raised in arbitral disputes and when violations of access to justice can be challenged; ramifications of arbitration clauses in contracts; ensuring fairness and efficiency arising from technological innovations applied to arbitration; legal framework applicable to online dispute resolution and blockchain-based arbitration, especially with regard to recognition and enforcement; and access to justice in arbitrations involving sexual harassment. The book concludes with three chapters on access to justice under the rules of arbitral institutions as revealed by studies of the World Intellectual Property Organisation, the Singapore International Arbitration Centre, and the International Centre for Settlement of Investment Disputes. Arbitration provides a final binding decision that can be challenged on very limited grounds; thus, with arbitration settling disputes that were originally a prerogative of the judiciary, securing fairness in such procedures is

paramount to the survival of arbitration. For this reason, arbitration practitioners, institutions, and academics will appreciate this deeply-informed analysis and commentary on a crucial aspect of a highly significant and rapidly evolving area of practice.

The South Texas Health Status Review Jun 28 2022 This book is a roadmap of the exact health disparities that burden the health of South Texas residents, especially Hispanics, compared to the rest of Texas and nation. This type of knowledge has the potential to fuel and motivate researchers and public health leaders to create and shape interventions to reverse those health disparities. Most notably, focus on obesity and diabetes prevention efforts and modifiable risk factors—such as nutrition, reproductive factors and access to health care—has significant potential to reduce the burden of disease in South Texas communities. South Texas, a 38-county region that spans 45,000 square miles along the Texas-

Mexico border northward to the area around metropolitan Bexar County (home to San Antonio), is home to 18% of the state's population. Yet South Texas residents, who are 68% Hispanic, struggle with lower educational levels, less income and less access to health care—and, as a result, suffer from a wide variety of health disparities. To study the health status and identify the exact health disparities that exist in the region, researchers from The UT Health Science Center at San Antonio teamed with researchers from the Texas Department of State Health Services to develop the South Texas Health Status Review. The Review team analyzed a variety of the latest county, state and national data to compare South Texas' incidence, prevalence and mortality rates for more than 35 health indicators—from cancers to chronic diseases like diabetes to communicable diseases like HIV/AIDS to maternal health and even environmental health—to the rest of Texas and the nation by age, sex, race/ethnicity and

rural/urban location.

[Animal Abuse](#) Aug 07 2020 Animal abuse is an increasingly recognized issue throughout the world and makes headlines every year. The plight of animals is well documented, but the

hidden cost to those who help is not fully understood. This practical handbook covers definitions, types and explanations of forms of animal abuse, and then examines the impacts of animal abuse on professionals and provides coping strategies. The book concludes with a guide to dealing with animal abuse, including providing first aid for common emergencies and dealing with the human abusers.

The Eternal Revolution Sep 19 2021 More than three decades have passed since the establishment of the Islamic Republic of Iran in 1979. In that time, theories of modern revolution would suggest a retreat from ideological goals, heralding a phase of institutional development. However, Hamad Albloshi argues that Iran is unique: the current rhetoric of conservative Iranian leaders implies the regime has not left its revolutionary stage. Through an examination of the hardline conservative ideology in Iran-personified by the former president, Mahmoud Ahmadinejad-this book explores how the usual

development seen in revolutions from radical discourse to pragmatic rhetoric has not been the case in Iran. Albloshi explores the evolution of the hardline conservatives and their main ideas about the nature of the Iranian regime, their position toward other groups within the system, and their approach to the international community. By doing so, he sheds new light on the group's position in the country and the ideological roots of major shifts that occurred in Iran's internal and external policies in the period between 2005 and 2013.

Introduction to International Human Resource Management Jun 04 2020 This text provides students with an introduction to international human resource management. The authors assume no background knowledge of HRM and blend academic theories with numerous practical examples. Case studies from a wide range of geographical regions and cultures are employed, East as well as West.

[Environmental Law and Policy in Wales](#) Nov 21

2021 This book is a collective academic response from environmental law scholars sharing an interest in Welsh perspectives on today's local and global environmental challenges. The editors brought colleagues together at a groundbreaking colloquium at Swansea University in April 2011, seeking to foster new legal approaches at a time that sees a new dynamic toward a devolved Wales, including in the environmental policy field. This afforded the opportunity to reflect on pressing environmental quandaries, and to bring together contributors' conceptual insights and technical legal know-how in identifying ideas for potential responses and solutions. These environmental problems with palpably global implications, such as climate change, thus require engagement at regional and local levels to look to the future. Holyoak and Torremans Intellectual Property Law Aug 26 2019 Holyoak and Torremans Intellectual Property Law provides a complete introduction and overview of UK intellectual

property law. It examines how the law has developed through key statutory provisions and leading cases, and highlights the increasing influence of the EU and other international jurisdictions in shaping the law in its global context.

Preliminary References to the European Court of Justice Aug 19 2021

This book provides a detailed examination of the law and practice of the preliminary reference procedure in EU law. It is designed to be of practical use in litigation and case preparation.

Modern Piracy Nov 02 2022 A number of books dealing with piracy have been published in recent years. This book stands out by the breadth of its coverage, which, unusually and much to be welcomed, includes detailed consideration of both public and private law. The book is also notable for the quality and range of expertise of its contributors, who are not only leading experts in the field but a mixture of academic and practising lawyers. Ò ð Robin

Churchill, The University of Dundee, UK Piracy once again is posing serious threats to international trade, navigation and, of course, to the safety of seafarers. This collection of outstanding essays by outstanding scholars and practitioners examines the background to the re-emergence of piracy in South Asia, East and West Africa and explores the complex legal and practical challenges which crafting effective responses has presented. It is, quite simply, essential reading for anyone who is seriously interested in understanding and responding to one of the most pressing problems of our time. Malcolm Evans, University of Bristol, UK Modern Piracy is the first book to survey the law of maritime piracy from both public law and commercial law perspectives, as well as providing a contextual overview of piracy in major hotspots. Topics covered include issues of international law, law-enforcement cooperation, private armed security, ransoms, insurance and carriage of goods by sea. It provides a

comprehensive introduction to the range of legal issues presented by the modern piracy menace and will be of interest to scholars and practitioners alike. Benefiting from a wide range of international expertise, this book will be of interest to public international law academics, government legal counsel, maritime commercial law practitioners, international relations academics as well as anyone interested in transnational organised crime.

Neurodegenerative Disease and Micronutrients
Oct 28 2019 The book proposes that a preparation of antioxidants and micronutrients, in combination with standard therapy, may reduce progression and improve management better than standard therapy alone for Alzheimer's, Parkinson's, and Huntington's disease, as well as PTSD, traumatic brain injury, concussions, and cerebral vascular insufficiency. The book presents the latest research on the effects of micronutrients and recommends formulations for use in combination with

standard therapies for these neurodegenerative diseases and conditions.

International Commercial Arbitration Aug 31 2022 International Commercial Arbitration is an authoritative 4,250 page treatise, in three volumes, providing the most comprehensive commentary and analysis, on all aspects of the international commercial arbitration process that is available. The Third Edition of International Commercial Arbitration has been comprehensively revised, expanded and updated, To include all legislative, judicial and arbitral authorities, and other materials in the field of international arbitration prior to June 2020. It also includes expanded treatment of annulment, recognition of awards, counsel ethics, arbitrator independence and impartiality and applicable law. The revised 4,250 page text contains references to more than 20,000 cases, awards and other authorities and will enhance the treatise's position as the world's leading work on international arbitration. The first and

second editions of International Commercial Arbitration have been routinely relied on by courts and arbitral tribunals around the world ((including the highest courts of the United States, United Kingdom, Singapore, India, Hong Kong, New Zealand, Australia, the Netherlands and Canada) and international arbitral tribunals (including ICC, SIAC, LCIA, AAA, ICSID, SCC and PCA), e.g.: U.S. Supreme Court - GE Energy Power Conversion France SAS, Corp. v. Human Rights Protection in Global Politics Mar 02 2020 This edited book by Mills and Karp brings together political, legal and moral perspectives on the responsibilities of human rights protection in world politics today. It critiques a narrow focus on states' 'violations' of human rights, incorporates non-state actors, and looks beyond the 'Responsibility to Protect' policy framework.

France Jan 24 2022 This technical note examines housing prices and financial stability in France. The note highlights that sharply rising housing prices have caused concerns about mortgage credit risk and the stability of the financial

system, particularly if the macroeconomic environment were to deteriorate further. France's housing market proved resilient during the crisis, declining by about 9 percent from its precrisis peak before rebounding since mid-2009 to surpass its precrisis peak. This resilience has reflected a confluence of fundamental, macroeconomic, financial, and asset allocation factors that have caused the demand for housing to remain well in excess of supply.

Indus River Basin Jan 12 2021 Indus River Basin: Water Security and Sustainability provides a comprehensive treatment of water-related issues within the Indus River basin. Each chapter is written by an expert in the field, hence this book serves as a single, holistic source covering the whole region, not just a single country. Many of the challenges faced by this region are trans-boundary issues, especially within the context of climate change and water

scarcity. Topics covered include extreme engineering and water resource management (one of the largest irrigation systems in dry to semi-desert conditions), social sciences (population dynamics linked to water resources) and political sciences. As such, this book is relevant and important to all researchers interested in these issues. Includes detailed chapters provided by specialists in each different field as compiled by well experienced editors Presents work from related fields across the Indus basin and makes them easily accessible on one single place Shows the Indus River as a type case and shares issues relevant to other locations across the world

Third-Party Reproduction Sep 07 2020 The first IVF conceived birth in 1978 resulted in a significant growth of third party reproductive options which continue to raise ethical, legal, and psychological questions. Third party reproduction procedures can involve as many as five people: sperm donor, egg donor, gestational

carrier, and intended parents. *Third-Party Reproduction: A Comprehensive Guide* utilizes experts in the field to address the medical, psychological, ethical and legal aspects of sperm donation, egg donation, embryo donation, and the use of gestational carriers. In addition, there are chapters on the medical and ethical aspects of posthumous reproduction, religious aspects of third party reproduction, and how to avoid pitfalls of third party reproduction. Aimed at physicians, trainees, psychologists, nurses, and social workers whose practices may include patients considering third party reproduction, the intent of this book is to provide a comprehensive and practical overview of the many aspects of third party reproduction to help all those involved to better understand them. Patients considering third party reproduction may also find value in this book.

Land Grabs in a Green African Economy Jul 26 2019 This book focuses on profiling, from both literature-based and primary research points of

orientation, instances of land grabs and/or acquisitions with a focus on the implications of land grabs for trade, investment and development policy in Africa under the global green economy transition agenda. In many instances, case studies and examples paint a picture that could be of use to policy-makers. Overall, the book advocates a 'satisfy-satisfy' orientation when land deals are made, as well as total transparency from key actors, building grassroots negotiation capacity and awareness. To illustrate some of the emerging issues in terms of land-grabs, acquisition and their implications for trade, investment and development policies, the sixth Trade Policy Training Centre in Africa (trapca) conference took place in Arusha, Tanzania on 24 and 25 November 2011. The conference had two objectives: (1) to come up with concrete policy interventions and recommendations that would harness foreign investment in land on the continent; and (2) to publish this edited book of

selected papers presented at the conference that met the rigorous specifications laid down by the editors and publishers. One of the major revelations to emerge from the Conference was that 'there is no vacant land in Africa'. In addition, participants took the view that land deals in Africa needed to be done on a 'satisfy-satisfy-satisfy' rather than a 'win-win-win' basis. This book is jointly published by trapca and the Africa Institute of South Africa (AISA).

Power Play in Latin Love Elegy and its Multiple Forms of Continuity in Ovid's

>Metamorphoses Mar 26 2022 Conceived as a necessary reconsideration of the pristine "elegiac question" in Ovid's *Metamorphoses*, this book intends to offer an analysis of the function of elegiac discourse within Ovid's magnum opus from the perspective of metapoetics. To that end, the author undertakes, in the first section, a close re-reading of some relevant passages of Latin love elegy. From a prism that takes into account the characteristically elegiac

multivocality, the genre reveals itself as an agonistic discourse in which the poet dramatises his metaliterary power-relation with the puella, who is unveiled as the synthesis of the distinct sub-products of his poetic activity. Thereupon, the author proceeds to scrutinise how elegiac elements are assimilated and transformed as they become integrated within the framework of Ovid's poem of changing forms. Far from being a mere stylistic ornament, the presence of an elegiac register in many erotic passages tells us about Ovid's stance towards love as a metapoetic trope. By reworking elegiac tradition to the point of transforming it into a novum corpus, the poet ultimately substantiates the mutability of generic categories.

Agricultural Markets in a Transitioning

Economy Feb 10 2021 This book presents major challenges and opportunities facing agriculture sectors in the wake of the transition from a planned to market economy. Using Albania as a case study, it examines the shift from

communism to free markets and the lasting effects of such change on agricultural production and education. Using primary research sources to give readers an accurate portrayal of the path that lies ahead for many developing countries, the book also looks at the future of agriculture in transitioning economies.

The Shadow World Oct 01 2022 Soon to be a Major PBS Documentary Event The Shadow World is the harrowing behind-the-scenes tale of the global arms trade, revealing the deadly collusion that all too often exists among senior politicians, weapons manufacturers, felonious arms dealers, and the military—a situation that

compromises our security and undermines our democracy. Pulling back the curtain on this secretive world, Andrew Feinstein reveals the corruption and the cover-ups behind a range of weapons deals, from the largest in history—between the British and Saudi governments—to the guns-for-diamonds deals in Africa and the imminent \$60 billion U.S. weapons contract with Saudi Arabia. He exposes in forensic detail both the formal government-to-government trade in arms and the shadow world of illicit weapons dealing, and lays bare the shockingly frequent links between the two. Drawing on his experience as a member of the African National Congress who resigned when the ANC refused to launch a corruption investigation into a major South African arms deal, Feinstein illuminates the impact this network has not only on conflicts around the world but also on the democratic institutions of the United States and the United Kingdom. Based on pathbreaking reporting and

unprecedented access to top-secret information and major players in this clandestine realm, *The Shadow World* places us in the midst of the arms trade's dramatic wheeling and dealing—from corporate boardrooms to seedy out-of-the-way hotels—and reveals the profound danger and enormous financial cost this network represents to all of us.

Management with Online Study Tools 12 Months

Sep 27 2019 Samson/Daft/Donnet's *Management* is a robust foundation text providing a balance of broad, theoretical content with an engaging, easy-to-understand writing style. It covers the four key management functions - planning,

organising, leading and controlling - conveying to students the elements of a manager's working day. Along with current management theory and practice, the authors integrate coverage of innovation, entrepreneurship, agile workplaces, social media and new technology throughout.

This sixth edition features a new author on the team and contains updates to content based on recent research. Real-life local and international examples showcase the ongoing changes in the management world. Focusing on a 'skills approach', they bring concepts to life for students, supporting motivation, confidence and mastery. Each part concludes with a contemporary continuing case study, focusing on car company Toyota as it faces managerial challenges and opportunities in the region.

China's Aid to Africa Oct 09 2020 Although China has rapidly increased foreign aid to Africa and is now a relatively major player in the developmental assistance regime, little is still known regarding how China delivers its foreign

aid, and even less about how this foreign aid actually works in the recipient countries. This book, extensively utilising Chinese sources, much of which have not been available before, examines the effectiveness and sustainability of China's foreign aid in Africa, as well as the political, economic and diplomatic factors that influence Chinese aid disbursement policies. The book argues that a nebulous notion of "friendship", however ill-defined, is a key factor in Chinese aid, something which is often overlooked by Western scholars. Through a detailed examination of both the decision-making process in Chinese aid disbursements, as well as an examination of specific case studies in West Africa, this book improves our understanding of China's foreign aid policies towards Africa. It finds that there are profound shortcomings in China's foreign aid at present which, despite the protestations of "friendship" and solidarity, undermine Beijing's effectiveness as an actor in the developmental assistance

enterprise in Africa. This text will be of key interest to scholars and students of development studies, African studies, China-Africa relations and more broadly to international relations.

An Introduction to Social Policy Nov 09 2020 An Introduction to Social Policy explores essential welfare topics, themes and issues for students studying social policy or related disciplines such as sociology, social work, or nursing and social care. - Part One examines key concepts including welfare, social justice, diversity and health and well-being. - Part Two explores policy issues in relation to key stages of the lifecourse. - Part Three takes a comparative perspective, discussing the international issues and supranational bodies that impact on British and European social policy today. The concise

chapters define the key terms and outline the central debates, giving students a fundamental foundation for their degree. Chapter overviews and summaries guide readers through the book, and questions for reflection conclude each chapter to test readers' knowledge. This book is essential reading for all students of social policy and the social sciences, as well as those taking joint honours programmes in social work, sociology, criminology, politics and social care. Peter Dwyer is Professor of Social Policy at the University of Salford. Sandra Shaw is Senior Lecturer in Social Policy at the University of Salford.

Game Farm and Hunting Tourism Jan 30 2020 Wildlife tourism, of which game farms form an important part, is one of South Africa's biggest tourism products with more game conserved and land under protection than all provincial and national parks combined. Therefore wildlife tourism, especially hunting, is a very important source of income for the

country and contributes to job creation in rural provinces like Limpopo, Northern Cape, North West and Eastern Cape. This book places emphasis on hunting (trophy and biltong), game farm development for tourism purposes, game management, game farming and the law, and important future trends. The book is aimed at game farm owners, hunters, hunting outfitters, professional hunters and students in search of knowledge concerning game farm and hunting tourism.

Practising Virtue May 28 2022 International arbitration has developed into a global system of adjudication, dealing with disputes arising from a variety of legal relationships: between states, between private commercial actors, and between private and public entities. It operates to a large extent according to its own rules and dynamics - a transnational justice system rather independent of domestic and international law. In response to its growing importance and use by disputing parties, international arbitration

has become increasingly institutionalized, professionalized, and judicialized. At the same time, it has gained significance beyond specific disputes and indeed contributes to the shaping of law. Arbitrators have therefore become not only adjudicators, but transnational lawmakers. This has raised concerns over the legitimacy of international arbitration. Practising Virtue looks at international arbitration from the 'inside', with an emphasis on its transnational character. Instead of concentrating on the national and international law governing international arbitration, it focuses on those who practice international arbitration, in order to understand how it actually works, what its sources of authority are, and what demands of legitimacy it must meet. Putting those who practice arbitration into the centre of the system of international arbitration allows us to appreciate the way in which they contribute to the

development of the law they apply. This book invites eminent arbitrators to reflect on the actual practice of international arbitration, and its contribution to the transnational justice system.

The Law Reports of the Special Court for Sierra Leone Apr 02 2020 This volume, which consists of three books and a CD-ROM and is edited by two legal experts on the Sierra Leone court, presents, for the first time in a single place, a comprehensive collection of all the interlocutory decisions and final trial and appeals judgments issued by the court in the case Prosecutor v. Charles Ghankay Taylor. The Taylor case is the jewel in the crown of the SCSL, as it was the first ever trial and conviction of a former African head of state for crimes committed in a neighboring state. It is also one of a handful of such significant cases in international criminal law.
