Literacy Leadership in Changing Schools Mar 02 2020 Literacy Leadership in Changing Schools will help literacy leaders improve teachers' professional development in grades K-6. The authors use literacy basics to suggest concrete approaches that leaders and coaches can use to help teachers improve their instruction with culturally and linguistically diverse students. Based on firsthand experiences, research, and a school-university-community collaborative (Changing Suburbs Institute in New York), this practical book homes in on what literacy leaders need to do in today's rapidly changing schools. With vignettes, strategies, and guidelines, each chapter is devoted to one essential component of serving as an effective literacy leader. Throughout, the book addresses typical issues leaders and teachers face, such as high-stakes testing, increasing failure rates, rigorous teacher and principal evaluations, family engagement, shrinking resources, and teachers' inexperience with instructing diverse students. Today's educators are faced with the challenge of meeting the increased expectations associated with a high quality education for all children. The contributors provide an excellent resource of relevant information along with a wealth of concrete suggestions for meeting that challenge through effective leadership and ongoing, embedded professional development. The result is a road map for enriched learning experiences for the professionals involved and ultimately for the students they teach. [Dorothy S. Strickland, Samuel DeWitt Proctor Professor of Education Emerita, Rutgers "This book encourages and supports leaders as they create bold, thoughtful and empowering pathways for professional development. It is a recipe that has the power to highlight the joy of professional growth and learning for leaders, teachers and students alike. To me, that is truly fabulous." Jennifer Scoggin, Director of LitLife, Connecticut "The authors address important aspects of the decision-making process, namely how to really know someone or something well before making a choice. Too many of our educational choices are based on outdated or misinformation and this book clearly shows school leaders how to obtain accurate information when creating a cohesive literacy model. This book also takes complex aspects of literacy professional development, such as standards and instructional techniques and breaks them down in clear and applicable ways so that decisions can not just be made but also be implemented." Growing Readers Sep 27 2019 Primary-grade teachers face an important challenge: teaching children how to read while enabling them to build good habits so they fall in love with reading. Many teachers find the independent reading workshop to be the component of reading instruction that meets this challenge because it makes it possible to teach the reading skills and strategies children need and guides them toward independence, intention, and joy as readers. In Growing Readers, Kathy Collins helps teachers plan for independent reading workshops in their own classrooms. She describes the structure of the independent reading workshop and other components of a balanced literacy program that work together to ensure young students grow into strong, well-rounded readers. Kathy outlines a sequence of possible units of study for a yearlong curriculum. Chapters are devoted to the individual units of study and include a sample curriculum as well as examples of mini-lessons and reading conferences. There are also four "Getting Ready" sections that suggest some behind-the-scenes work teachers can do to prepare for the units. Topics explored in these units include: print and comprehension strategies; reading in genres such as poetry and nonfiction; connecting in-school reading and out-of-school reading; developing the strategies and habits of lifelong readers. A series of planning sheets and management tips are presented throughout to help ensure smooth implementation. We want our students to learn to read, and we want them to love to read. To do this we need to lay a foundation on which children build rich and purposeful reading lives that extend beyond the school day. The ideas found in Growing Readers create the kind of primary classrooms where that happens.

Literacy Instruction for Students who are Deaf and Hard of Hearing Feb 10 2021 Most students who are deaf or hard of hearing (DHH) struggle with acquiring literacy skills, some as a direct result of their hearing loss, some because they are receiving insufficient modifications to access the general education curriculum, and some because they have additional learning challenges necessitating significant program modifications. Additionally, instructional practices for DHH students tend to be directed toward two sub-populations of DHH students: those with useable access to sound and those without. Literacy Instruction for Students who are Deaf and Hard of Hearing describes current, evidence-based practices in teaching literacy for DHH students and provides practitioners and parents with a process for determining whether a practice is or is not "evidence-based." Easterbrooks and Beals-Alvarez describe the importance of the assessment process in providing on-going progress monitoring to document students' literacy growth as a primary means to direct the course of instruction. They address the five key areas of instruction identified by the National Reading Panel: phonemic awareness, phonics, fluency, vocabulary, and comprehension. In this concise guidebook, the authors present the role of assessment in the literacy process, an overview of evidence-based practices, and in the absence of such information, those practices supported by causal factors across the National Reading Panel's five areas of literacy. They also review the evidence base related to writing instruction, present case studies that reflect the diversity within the DHH population, and review the challenges yet to be addressed in deaf education.
