Sustainable Management Development in Africa Sep 19 2021

Sustainable Management Development in Africa examines how African management and business scholarship can serve African and multinational management and organizations operating in Africa. In a broader sense, this book, within an African context, explores how human capital and intellectual capabilities can be organized at the higher education level; describes the cultural, social, and political influencers impacting management and organization; helps conceptualize African management theories to address organizational effectiveness; addresses the current management and organizational practices in Africa in identifying challenges; and provides guidance for more effective management and organizational operation. Aimed at researchers, academics, and advanced students alike, this book lays the groundwork for the application of uniquely African theoretical and practical perspectives for sustainable management and organizational operation, as explained from a contemporary African point of view. In addition and most important, this book contains a uniquely African content that allows for developing new theories and examining new ways of doing business, thus reaffirming the rise of African scholarship in the fields of management, organization, and business.

American Monthly Review of Reviews Nov 29 2019

Syntactic Geolectal Variation Mar 14 2021 This volume brings together studies that combine both traditional and contemporary tools in the study of syntactic geolectal variation, with a special focus on a subset of Iberian varieties. There is an increasing body of research on

syntactic micro-variation, but the interaction between dialectology (which makes use of atlases, corpora, databases, questionnaires, interviews, etc.) and formal syntactic studies has traditionally been weak (or even nonexistent), which is precisely the gap the contributions in this book aim at filling in. From a broader perspective, this collection is meant as a contribution to the subfield of linguistic variation and to the more general field of Romance linguistics, with special interest in Spanish and in other Iberian languages. The volume is meant for both researchers and students interested in linguistic variation or dialectology and, specifically, in syntactic variation in Iberian languages.

The History and Traditions of Mallerstang Forest and Pendragon Castle Jun 04 2020

Marketing, Consumption, and the Traditions of Place Jul 30 2022

Creating Selves Feb 10 2021 The concept of creativity, together with concerns over access to creativity and knowledge, are currently the subject of international debate and unprecedented public attention, particularly in the context of international developments in intellectual property laws. Not only are there significant developments at the legal level, with increasing moves towards stronger and harmonized protection for intellectual property, but also there is intense public interest in the concepts of creativity, authorship, personality, and knowledge. In *Creating Selves*, Johanna Gibson addresses strategic responses to intellectual property, and suggests alternative models for encouraging, rewarding, and disseminating creative and innovative output, which are built upon a critical analysis of and approach to the debate and to the concept of creativity itself. Drawing upon critical theories in authorship, literature, music, the sciences and the arts, Gibson suggests a radical re-consideration of the notion of creativity in

the intellectual property debate and the means by which to encourage and sustain creativity in contemporary society.

The London Quarterly Review Apr 02 2020

Ginseng Jan 12 2021 Ginseng is the most well-known Chinese medicine as well as one of the most used herbal medicines. It has a wide range of medical and pharmacological uses. This book provides an up-to-date critical view of the botanical description and complexity of ginseng, including its phytochemistry, traditional and biotechnological production systems, traditional usage, current applications, and future directions for the development of ginseng compounds as effective medicinal agents. It is a useful resource for academicians, scientists, students, and industry professionals interested in traditional medicine and ginseng.

The End of Tradition? Sep 27 2019 Rooted in real-world observations, this book questions the concept of tradition. In his introduction, Nezar AlSayyad discusses the meanings of the word 'tradition' and the current debates about the 'end of tradition'. Thereafter the book is divided into three parts.

Reflections on the UN Declaration on the Rights of Indigenous Peoples Dec 11 2020 The adoption of the Declaration on the Rights of Indigenous Peoples by the United Nations General Assembly on 13 September 2007 was acclaimed as a major success for the United Nations system given the extent to which it consolidates and develops the international corpus of indigenous rights. This is the first in-depth academic analysis of this far-reaching instrument. Indigenous representatives have argued that the rights contained in the Declaration, and the processes by which it was formulated, obligate affected States to accept the validity of its provisions and its

interpretation of contested concepts (such as 'culture', 'land', 'ownership' and 'self-determination'). This edited collection contains essays written by the main protagonists in the development of the Declaration; indigenous representatives; and field-leading academics. It offers a comprehensive institutional, thematic and regional analysis of the Declaration. In particular, it explores the Declaration's normative resonance for international law and considers the ways in which this international instrument could catalyse institutional action and influence the development of national laws and policies on indigenous issues.

Kaffir Folk-lore Jun 16 2021 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Traditional Musics in the Modern World: Transmission, Evolution, and Challenges Apr 26 2022 This book reviews the current practices of traditional musics in various cultures of all continents, and examines the impact and significance of traditional musics in the modern world. A diverse group of experts of musicology and music education collaborate to expose the current practices and challenges of transmission and evolution of traditional musics in order to seek sustainable development, so that traditional musics can take the place they deserve in the modern world and continue to contribute to human civilization. This volume contains three main sections that include transmission of traditional musics, authenticity and evolution, as well as challenges in future. Based on the chapters, the editor proposes four major trends of transmission of traditional musics, namely, formalization, politicization, Westernization and modernization in transforming contexts.

The Sound Current Tradition Oct 01 2022 The practice of listening to subtle, inner sounds during meditation to concentrate and elevate the mind has a long history in various religions around the world, including Islam, Christianity, Hinduism, Buddhism, Jainism, and Sikhism. Today there are a number of new religious movements that have made listening to the inner sound current a cornerstone of their teachings. These groups include the Radhasoamis, the Divine Light Mission, Eckankar, the Movement of Spiritual Inner Awareness (MSIA), MasterPath, the Sawan-Kirpal Mission, Quan Yin/Ching Hai, Manavta Mandir, ISHA, and a number of others. In this study we

provide a historical and comprehensive overview of these movements and how they have incorporated listening to the inner sound as part of their spiritual discipline. We are particularly interested in the distinctive and nuanced ways that each group teaches how to listen to the inner sound current and how they interpret it in their own unique theologies.

Natural History Dioramas - Traditional Exhibits for Current Educational Themes May 28 2022

This book presents the history of natural history dioramas in museums, their building and science learning aspects, as well as current developments and their place in the visitor experience. From the early 1900s, with the passage of time and changes in cultural norms in societies, this genre of exhibits evolved in response to the changes in entertainment, expectations and expressed needs of museum visitors. The challenge has always been to provide meaningful, relevant experiences to visitors, and this is still the aim today. Dioramas are also increasingly valued as learning tools. Contributions in this book specifically focus on their educational potential. In practice, dioramas are used by a wide range of educational practitioners to assist learners in developing and understanding specific concepts, such as climate change, evolution or or conservation issues. In this learning process, dioramas not only contribute to scientific understanding and cultural awareness, but also reconnect wide audiences to the natural world and thereby contribute to the well-being of societies. In the simultaneously published book: "Natural History Dioramas - Traditional Exhibits for Current Educational Themes, Socio-cultural Aspects" the editors focus on socio-cultural issues and the potential of using dioramas to engage various audiences with - and in - contemporary debates and big issues, which society and the natural environment are facing.

The Oxford Handbook of Comparative Cognition May 16 2021 In the past decade, the field of comparative cognition has grown and thrived. No less rigorous than purely behavioristic investigations, examinations of animal intelligence are useful for scientists and psychologists alike in their quest to understand the nature and mechanisms of intelligence. Extensive field research of various species has yielded exciting new areas of research, integrating findings from psychology, behavioral ecology, and ethology in a unique and wide-ranging synthesis of theory and research on animal cognition. The Oxford Handbook of Comparative Cognition contains sections on perception and illusion, attention and search, memory processes, spatial cognition, conceptualization and categorization, problem solving and behavioral flexibility, and social cognition processes including findings in primate tool usage, pattern learning, and counting. The authors have incorporated findings and theoretical

approaches that reflect the current state of the field. This comprehensive volume will be a must-read for students and scientists who want to know about the state of the art of the modern science of comparative cognition.

Laurie Phippen's All Natural Antibacterial Agents Aug 19 2021 The classification antibacterial includes anything that destroys bacteria or inhibits the ability of bacteria to grow and reproduce. Herbals approach bacterial infection from two directions. They stimulate the immune system to produce more immune cells aiding your body's ability to fight the infection and they act in direct opposition to bacteria by inhibiting their ability to grow and reproduce so they cannot survive. The first line of defense against bacterial infection is prevention. Disinfecting surfaces with known antibacterial cleaners, maintaining good health through diet, rest, and exercise, and minimizing exposure to infectious agents is far more effective than any treatment plan in the continued battle against bacteria. Regardless of the preventative care you take, there are always times where treating an infection will be necessary. Traditionally, bacterial infection is fought by blending herbals that support the body's own natural defenses with those that act to inhibit and kill the bacteria. Using a combination that blends both actions helps to minimize the duration and severity of any infection. Many herbs and oils act as natural immunostimulant and antibacterial agents. Some of these natural products work as well as or even better than the products sold in your local pharmacy. Some of the items in your local pharmacy are even created based on the chemical constituents of plants you might have growing in your own yard. This guide contains antibacterial agents that act as both disinfectants for infected air and surfaces and disease fighting agents for the body. Both categories eliminate harmful bacteria. It is important that you read the traditional uses and side effects of each plant and discuss any alternative treatment with a qualified herbalist or physician prior to choosing a natural product.

Traditional Ojibwa Religion and Its Historical Changes Sep 07 2020 This study describes & analyzes traditional Ojibwa religion & the changes it has undergone through the last three centuries. It emphasizes the influence of Christian missions to the Ojibwas in effecting religious changes, & examines the concomitant changes in Ojibwa culture & environment through the historical period. Taking into account relevant ethnological & historical data, the author's primary aim has been to understand: (1) (synchronically) aboriginal Ojibwa religion & (2) (diachronically) how it has changed through time. Contents: Review of Sources Regarding Ojibwas; Criteria for Determining What Was Traditional Ojibwa Religion; Ojibwa History; Christian Missions to the Ojibwas; Ojibwa Responses to Christian Missions; The Ojibwa Person, Living & Dead; The Manitos; Nanabozho & the Creation Myth; Ojibwa Relations with the Manitos; Puberty Fasting & Visions; Disease, Health, & Medicine; Religious Leadership; Midewiwin; Diverse Religious Movements; The Loss of Ojibwa Religion; & Bibliography. Maps & chart. Fourth printing.

Current Techniques in Small Animal Surgery, Fifth Edition Mar

26 2022 Current Techniques in Small Animal Surgery, Fifth Edition provides current information regarding surgical techniques from the perspective of clinicians who are performing specific procedures on a regular basis. It is intended to be concise, well illustrated, and reflective of the writer's experience, both good and bad. The emphasis with this volume is technique. The pathophysiologic principles and applications are covered in the companion volume, Mechanisms of Disease in Small Animal Surgery, Third Edition. These two books are regarded by most practitioners and students as being a two-volume set.

Rural Energy Development in China Jul 18 2021 In this title, originally published in 1981, author Robert P. Taylor calls for a greater understanding of rural energy supply and consumption patterns in the developing countries. Here, Taylor specifically examines the rural energy development in China as it is the world's largest developing country in terms of population, and it has encountered many of the rural energy problems common in other developing countries. This study provides an analysis of China's rural energy economy from before 1949 to a general discussion of achievements in rural energy development and the rural energy economy in 1981. This is an ideal title for students interested in environmental studies and development studies.

Online versus traditional education. A contrasting analysis Aug 07 2020 Polemic Paper from the year 2018 in the subject Pedagogy - Common Didactics, Educational Objectives, Methods, grade: 1, , language: English, abstract: Educational transition has led to the development of new approaches for the 21st Century education. The emergence of online learning in the 1990s seems to have changed the relevance of traditional education. This can be attributed to the current social change and technological development. Ordinarily, the principal reason for learning is to acquire intellectual knowledge, but the element of usefulness of the acquired knowledge has become the key determinant of the mode of learning. Traditional and online education exhibits varied characteristics, which are useful in elucidating their similarities and differences. Concisely, characteristics of online education imply that learners assume full responsibility in the learning process. On the other hand, traditional education is characterized with shared responsibility between learners and instructors. Similarities between online and traditional education can be outlined with regard to reference materials, assignments, exams and the role of instructors in the learning process. All curricula involve assignments and exams for evaluating the learners' understanding of coursework and reference materials; either printed or electronic are intended to be used by students to extent their knowledge on different concepts. On the other hand, the two systems manifest differences in flexibility, interaction, communication, learning mode and skills development. Traditional education uses the classroom setup, whereas online learning is computer-based. In conclusion, traditional education holds high values over online education, especially with regard to the equivalency theory. Its high value is attributable to the face-to-face

aspect, which enhances skills development among learners.

Traditional Forest-Related Knowledge May 04 2020 Exploring a topic of vital and ongoing importance, Traditional Forest Knowledge examines the history, current status and trends in the development and application of traditional forest knowledge by local and indigenous communities worldwide. It considers the interplay between traditional beliefs and practices and formal forest science and interrogates the often uneasy relationship between these different knowledge systems. The contents also highlight efforts to conserve and promote traditional forest management practices that balance the environmental, economic and social objectives of forest management. It places these efforts in the context of recent trends towards the devolution of forest management authority in many parts of the world. The book includes regional chapters covering North America, South America, Africa, Europe, Asia and the Australia-Pacific region. As well as relating the general factors mentioned above to these specific areas, these chapters cover issues of special regional significance, such as the importance of traditional knowledge and practices for food security, economic development and cultural identity. Other chapters examine topics ranging from key policy issues to the significant programs of regional and international organisations, and from research ethics and best practices for scientific study of traditional knowledge to the adaptation of traditional forest knowledge to climate change and globalisation.

Natural History Dioramas Nov 09 2020 This book brings together in a unique perspective aspects of natural history dioramas, their history, construction and rationale, interpretation and educational importance, from a number of different countries, from the west coast of the USA, across Europe to China. It describes the journey of dioramas from their inception through development to visions of their future. A complementary journey is that of visitors and their individual sense making and construction of their understanding from their own starting points, often interacting with others (e.g. teachers, peers, parents) as well as media (e.g. labels). Dioramas have been, hitherto, a rather neglected area of museum exhibits but a renaissance is beginning for them and their educational importance in contributing to people's understanding of the natural world. This volume showcases how dioramas can reach a wide audience and increase access to biological knowledge.

[Legends of Babylon and Egypt in Relation to Hebrew Tradition](#) Mar 02 2020 Referred to as the Enûma Eliš, the Babylonian creation myth is recorded in Old Babylonian on seven clay tablets. Historians believe that this 1,000-line story was recited during religious ceremonies or rituals. The story begins with the introduction of two gods: Apsu, who represents fresh water, and Tiamat, Apsu's wife, who represents oceans. Other gods, including Ea, reside in Tiamat's vast, watery body. Ea and his brothers are very noisy and annoy Apsu and Tiamat. Apsu

proposes that they kill the young gods, but Tiamat disagrees. Apsu allies with Mummu, another young god and plots to kill Ea and his brothers. Tiamat warns Ea, who is capable of great magic, of the plot. Ea puts Apsu in a coma, kills him and banishes Mummu from the oceans. This action earns Ea the position of chief god. Time passes and Ea's son, Marduk, grows to be very powerful. Given wind to play with, Marduk causes severe disruption in the oceans with tornadoes and dust storms. Tiamat is disturbed, and after allying with other gods, decides to seek revenge on Marduk to avenge her late husband. After Tiamat creates 11 monsters to destroy the young gods in the oceans, Marduk offers to save the gods if they agree to make him their leader. The gods agree to this condition, and Marduk challenges Tiamat. He defeats her, rips her body in half, and fashions the top into the sky and the bottom into earth. As leader, Marduk creates the calendar, the sun and weather, aligns the planets and stars, and regulates the moon's cycle. Marduk kills Kingu, Tiamat's second husband, and from his blood creates mankind to labor for the gods in his new kingdom. The story goes on to explain that Babylon was established as the residence of the most powerful gods.

[Transforming the Latin American Automobile Industry](#) Feb 22 2022

This study looks at union responses to the changes in the Latin American car industry in the last 15 years. It considers the impact of the shift towards export production and regional integration, and the effect of political changes on union responses.

California. Court of Appeal (1st Appellate District). Records and Briefs Oct 21 2021

Tradition as Truth and Communication Aug 31 2022 Tradition is a central concept in the social sciences, but it is commonly treated as unproblematic. Dr. Boyer insists that social anthropology requires a theory of tradition, its constitution and transmission. He treats tradition "as a type of interaction which results in the repetition of certain communicative events," and therefore as a form of social action. Tradition as Truth and Communication deals particularly with oral communication and focuses on the privileged role of licensed speakers and the ritual contexts in which certain aspects of tradition are characteristically transmitted. Drawing on cognitive psychology, Dr. Boyer proposes a set of general hypotheses to be tested by ethnographic field research. He has opened up an important new field for investigation within social anthropology.

Homer's Traditional Art Oct 09 2020 In recent decades, the evidence for an oral epic tradition in ancient Greece has grown enormously along with our ever-increasing awareness of worldwide oral traditions. John Foley here examines the artistic implications that oral tradition holds for the understanding of the Iliad and Odyssey in order to establish a context for their original performance and modern-day reception. In Homer's Traditional Art, Foley addresses three crucially interlocking areas that lead us to a fuller appreciation of the Homeric poems. He first explores the reality of Homer as their actual author, examining historical and comparative evidence to propose that "Homer" is a legendary and anthropomorphic figure rather than a real-life author. He next presents the poetic tradition as a specialized and

highly resonant language bristling with idiomatic implication. Finally, he looks at Homer's overall artistic achievement, showing that it is best evaluated via a poetics aimed specifically at works that emerge from oral tradition. Along the way, Foley offers new perspectives on such topics as characterization and personal interaction in the epics, the nature of Penelope's heroism, the implications of feasting and lament, and the problematic ending of the Odyssey. His comparative references to the South Slavic oral epic open up new vistas on Homer's language, narrative patterning, and identity. Homer's Traditional Art represents a disentangling of the interwoven strands of orality, textuality, and verbal art. It shows how we can learn to appreciate how Homer's art succeeds not in spite of the oral tradition in which it was composed but rather through its unique agency.

Natural History Dioramas - Traditional Exhibits for Current Educational Themes Nov 02 2022 This book focuses on socio-cultural issues and the potential of using dioramas in museums to engage various audiences with - and in - contemporary debates and big issues, which society and the natural environment are facing, such as biodiversity loss. From the early 1900s, with the passage of time and changes in cultural norms in societies, this genre of exhibits evolved in response to the changes in entertainment, expectations and expressed needs of museum visitors. The challenge has always been to provide meaningful, relevant experiences to visitors, and this is still the aim today. Dioramas are also increasingly valued as learning tools. Contributions in this book specifically focus on their educational potential. In practice, dioramas are used by a wide range of

educational practitioners to assist learners in developing and understanding specific concepts, such as climate change, evolution or or conservation issues. In this learning process, dioramas not only contribute to scientific understanding and cultural awareness, but also reconnect wide audiences to the natural world and thereby contribute to the well-being of societies. In the simultaneously published book: "Natural History Dioramas - Traditional Exhibits for Current Educational Themes, Science Educational Aspects" the editors discuss the history of dioramas and their building and science learning aspects, as well as current developments and their place in the visitor experience.

Biblical Researches in Palestine, and in the Adjacent Regions
