Classical Studies Aug 28 2019 Why study the classics? For one thing, classicists have the distinguished pedigree of being among the first humanists to see and exploit the educational possibilities of new developments in information technology. Even better, they can translate such tantalizing tattoos as quod me nutrit me destruit, a quote which most famously resides on Angelina Jolie's belly. For these and other intrepid explorers of the minds of the past, Fred Jenkins offers a newly revised and expanded annotated bibliography of book-length reference works, covering the rise and fall of the Greek and Roman civilizations from the Bronze Age through the 6th century AD. While preference has been given to English-language works, many important titles in French, German, Italian, and Spanish have also been included. There is also increased coverage of ancient philosophy, religion (including early Christianity), and art and archaeology.

Interventional Spine Dec 01 2019 A comprehensive resource written by and for anaesthesiologists, physiatrists, neurologists, interventional radiologists, interventional pain specialists, orthopaedic surgeons, neurosurgeons and therapists treating painful spinal disorders globally. The book describes basic principles that must be understood before patients with spinal pain can be treated and procedures are clearly explained. Practice-proven diagnostic and therapeutic algorithms are given for all conditions. Detailed protocols are given for what to do in different scenarios and, most importantly, what to do next. Surgical treatment is covered only to the extent useful to the non-surgeon.

The American Heritage Guide to Archaeology Sep 21 2021 "This unique guide, with its more than sixteen hundred entries, covers the whole field of archaeology from human evolution and the prehistoric period to the civilizations of Egypt, the Near East, Europe, and the Americas. There are sections dealing with important sites, cultures, and ancient peoples, and with the technique of modern archaeological research. Other entries describe field monuments and the many kinds of artifacts found in excavations. Technical terms (which are often intimidating) are lucidly explained." -- Dust jacket.

Structure-Property Relations in Nonferrous Metals Jan 26 2022 This junior/senior textbook presents fundamental concepts of structure property relations and a description of how these concepts apply to every metallic element except iron. Part One of the book describes general concepts of crystal structure, microstructure and related factors on the mechanical, thermal, magnetic and electronic properties of nonferrous metals, intermetallic compounds and metal matrix composites. Part Two discusses all the nonferrous metallic elements from two perspectives: First it

explains how the concepts presented in Part One define the properties of a particular metallic element and its alloys. Second is a description of the major engineering uses of each metal. This section features sidebar pieces describing particular physical property oddities, engineering applications and case studies. An Instructor's Manual presenting detailed solutions to all the problems in the book is available from the Wiley editorial department. An Instructor's Manual presenting detailed solutions to all the problems in the book is available from the Wiley editorial department.
