[Formula One: Made In Britain](#) May 30 2022 Formula One: Made in Britain is one of Formula One's last untold stories. As a centre of technical excellence for over thirty years, Britain is at the sharp end of the worldwide motor sport industry, and playing ever harder to win. Most of the sport's Grand Prix teams are based in the UK and many of them have British managers and designers who act as a showcase for the UK's skill base - past, present and future. The success of Britain's Formula One industry has gone largely unrecognised outside the close-knit world of the racing aficionado. Now, with Formula One: Made in Britain, Clive Couldwell reveals what makes this industry tick and why many of the world's players choose to come here. He explores Motorsport Valley, an area which covers the south and Midlands of the UK, where 75 per cent of the world's single-seater racing cars are designed and built, and talks to many of F1's leading lights. Winning in F1 depends on innovation and performance-critical engineering, and in this fascinating and insightful book, Clive Couldwell show how UK research and development are leading the world.

Road Trip Feb 24 2022 A summer adventure you'll never forget, from a beloved Newbery Honor winning author! Dad and Ben haven't been getting along lately, and Dad hopes a road trip to rescue a border collie will help them reconnect. But Ben is on to Dad's scheme, and he's got ideas of his own. Like inviting his buddy, Theo, who's sure to get into fun (and trouble) along the way. And if Dad wants a family road trip, then the family dog, Atticus, should get to come, too. What could go wrong? But when their truck breaks down, the family trip takes plenty of unexpected turns. Before they know it, they've commandeered an old school bus and joined forces with its cranky mechanic, Gus. Next, they pick up Mia, a waitress escaping a tense situation. Only sharp-eyed Atticus realizes that Theo is on the run from something bad—and someone is following them. With alternating chapters from both Ben and his dog, Atticus, this fast-paced book takes readers on an unpredictable ride that's all about family, friendship, and surprises.

The Song of the Orphans May 18 2021 The thrilling second novel in the category-defying Silvers trilogy—melding X-Men and the novels of Blake Crouch—about six extraordinary people who become unwitting refugees on an unfamiliar Earth, and their epic quest to find out why. The end of the world was just the beginning for Hannah and Amanda Given. Saved from apocalypse by three mysterious beings, the sisters, along with four other refugees from their world, were each marked with a silver bracelet and transported to an entirely different Earth: a place where restaurants move through the air like flying saucers and the fabric of time is manipulated by common household appliances, as well as by their very own hands—and a place where terrifying new adversaries seem to be around every corner. Now, after six months in this alt-America and a tumultuous cross-country journey that landed them in New York City, the Silvers find themselves in more trouble than ever. Their new world is dying, and a clan of powerful time benders believes that killing them is the only

way to stop it. To make matters worse, the U.S. government has sent its most ruthless covert spy agency to track and capture them. But the biggest threat of all comes from the three god-like beings who first saved them. They had a reason for bringing the Givens and their friends to this world. And when the Silvers learn the awful truth, nothing will ever be the same.

Full speed ahead Jun 26 2019 Motorsport and aerospace are two industries in which the United Kingdom is a world leader and the Committee believes that the future success of the UK economy will be based on these types of industries. Concerns regarding the aerospace included the current US complaint in the World Trade organisation and the Government's right to support the industry through

Repayable Launch Investment; and that the UK aerospace sector has access to export trade credit at less favourable rates and through a more complex system than other countries. In examining the motorsport industry the Committee felt that there was a lack of understanding and effective engagement by Government. They are not content with the Government's current plans to take forward its work with the sector through the UK Automotive Council. Instead they recommend that the Government establish a dedicated motorsport policy team within the Department for Business, Innovation and Skills. Small and medium-sized enterprises also play a very important role in supporting both sectors but they have been hit worst by the recession and the Government needs to do more to encourage high performance engineering firms to diversify. Both sectors require a highly skilled workforce and more needs to be done to align the education system with the skills needs of the industries. Finally is the problem of the 'non-green' image that both industries have.
